Path Tutorial Module 5: Finding Articles
http://library.uncg.edu/tutorials

Learning Outcomes

Students will choose an appropriate database based on their information need.

Students will search a database efficiently using appropriate search terms.

Video Script

*Scene: 2 students - Kayla & Danny, sitting at home.*

Kayla: Okay, I have some books I reviewed but I really need some articles. Where can I get those?

Danny: A librarian was just talking to my class this morning on how to do research, so maybe you should talk to a librarian.

Kayla: Oh yea, I have gotten some good help so far from librarians but I don't feel like going back over there tonight.

Danny: You know you can do it online too, through chat.

Kayla: Awesome!

(Both lean toward computer)

Danny: Ok, yea go to the library web page ...

(Now showing chat window opening ...)

Danny: And all you have to do off the library web page is click Ask Us.

Kayla: Oh look you even send an IM or a text message.
