

**Ejournal Cancellations – 2020/21**  
**UNCG University Libraries**

For all of these proposed ejournal cancellations, we will retain access to many volumes published prior to 2021.

For 27 of the 43 journals on this list we will continue to receive new issues, but with delayed access.

As an example of "delayed access", we will continue to receive access to a new issue of "The journal of Cell Biology" every month, but beginning in 2021, the most recent issues will be 6 months ago.

The UNCG Libraries continue to operate an effective and efficient ILL service. We are able to obtain most articles for faculty, students, and staff within 4 - 5 working days.
